

PANASONIC

Panasonic 5095 TLON Manager Kit

Product code 43004 · Fire alarm systems > Control equipment

Software and hardware kit for creating, installing and maintaining the TLON network of Panasonic EBL512 G3 and EBL512 fire alarm control panels. Includes the TLON Manager software and a USB network interface.

- TLON Manager software for creating, installing and maintaining a TLON project
- U10 USB network interface (75010R) with cables
- Licence for 64 LNS credits per computer
- 2–30 EBL512 G3 or EBL512 panels in the network
- Also supports a redundant TLON network (networks 0 and 1)

Product description

5095 TLON Manager Kit is a tool kit for commissioning and servicing the TLON network of Panasonic EBL512 G3 and EBL512 fire alarm control panels. The TLON Manager 2.0 software is used to create a TLON project, install it in the panels of the network and maintain the network. The computer is connected to the TLON network with the kit's USB network interface.

The kit contains:

- U10 USB network interface, type 75010R
- network interface cable (1.5 m)
- USB memory stick with Echelon LNS Server 3.27, TLON Manager V2.0.x, the OpenLDV driver and documentation
- USB extension cable (0.6 m)
- licence (64 credits per computer)

Applications

From two to thirty panels can be connected to a TLON network. Each panel requires at least one TLON interface board (5090). Two interface boards can be used in EBL512 G3 panels, forming two parallel, i.e. redundant, networks; in this case two identical projects are created. Routers can be added to the network if necessary to increase the number of channels and the cable length, and the same network can contain both EBL512 G3 and EBL512 panels.

Installation

The project can be designed in the office without a network connection (Engineered Mode) and installed on site during commissioning. The USB network interface is connected to the panel's RJ45 connector (on EBL512 G3, J10 on the main board for network 0 and J11 for network 1). 64-bit Windows requires TLON Manager V2.0.1 or later and the OpenLDV driver.

Technical data

Product code	43004
Manufacturer	Panasonic

Product group	Fire alarm systems > Control equipment
Contents	U10 USB network interface 75010R, network interface cable 1.5 m, USB memory stick, USB extension cable 0.6 m, licence
Software	TLON Manager V2.0.x, Echelon LNS Server 3.27, OpenLDV driver
Licence	64 credits per computer
Connection	USB (computer), RJ45 (control panel)
Capacity	2–30 control panels in a TLON network
Compatibility	EBL512 G3 (main board 5010/5012), EBL512 (1556), TLON interface board 5090/1590

Documents

The manufacturer's original documents can be downloaded from the product page (QR code at the top of this sheet).
