Product description

This Emex MX25 sign panel is an escape route sign with a running figure and an arrow down (manufacturer's designation E3). The panel is fitted to the body of the MX25 exit sign, which illuminates the whole panel in both normal and emergency mode. The viewing distance of the complete exit sign is 25 m.

The panel meets the requirements of EN 1838: the luminance of the green area is at least 2 cd/m², the contrast between the white and green areas is 1:5–1:15, and the contrast within the same colour is less than 1:10. The signs comply with EN ISO 7010.

Compatibility

The panel fits MX25 bodies 825100 (1 h), 825300 (3 h) and 825302 (black, 3 h). The panel also fits RX bodies with a red cross (825101, 825301 and 825303), in which the panel is single-sided and the red cross panel is fitted over it. A complete exit sign consists of the body, the analogue base 3312FLW/3312W and the sign panel, which are ordered separately.

Installation

The panel is slid into the mounting profile of the body until it clicks into place, and it is locked with the fixing screw. Finally, the panel is turned to the correct direction.
