

PANASONIC

Panasonic 3313 cover for mounting base, 50 pcs

Product code 41342 · Fire alarm systems > Field devices

Plain protective cover for Panasonic 33xx series mounting bases. Protects the base when no detector is fitted, for example when addressable base sounder 3379 is used without a detector. Pack of 50.

- Protective cover for a mounting base without a detector
- Suitable for addressable base sounder 3379
- Also listed as an accessory for analogue mounting base 3312F
- Pack size 50 pcs

Product description

Panasonic 3313 is a plain cover used to protect a Panasonic 33xx series mounting base when no detector is installed in the base. This product is a pack of 50, suitable for larger sites and contracts.

Applications

According to the manufacturer's technical description, addressable base sounder 3379 can also be used without a detector, in which case cover 3313 is used to protect the base. The base sounder then acts purely as an alarm device, for example in premises where no detector is needed but the alarm must be heard.

The cover is also listed as an accessory in the brochure for analogue mounting base 3312F.

Installation

The cover is fitted to the base in place of the detector. The wiring and address setting of the base are carried out in accordance with the base's own technical description.

Technical data

Product code	41342
Manufacturer	Panasonic
Product group	Fire alarm systems > Field devices
