

PANASONIC

Panasonic 5094 EBLWin key

Product code 41014 · Fire alarm systems > Control equipment

EBLWin key (dongle) required for programming and commissioning Panasonic EBL fire alarm systems with the EBLWin software. The key serves as the software licence and as protection.

- Licence key for the EBLWin software
- For programming EBL512 G3 and EBLOne systems
- Also required for the EBLsniffer software of the wireless system
- EBLWin runs on Windows 10 or later

Product description

Panasonic 5094 is the EBLWin key, or dongle, required for using EBLWin, the commissioning and service software for Panasonic EBL fire alarm systems. The key protects the system so that the panels can only be programmed by an authorised installer or service company.

EBLWin is a Windows program (Windows 10 or later) for programming EBL512 G3 and EBLOne fire alarm control panels, gateways and the network between panels. The software supports both manual and automatic addressing and automatically calculates loop lengths and the required capacity of the standby batteries. Graphical loop scanning identifies all devices connected to the loop, and the graphical loop check verifies that the programming matches the installation. The same key is also required for the EBLsniffer software used with the wireless system planning tool 4613.

Use

The key is plugged into the computer on which EBLWin is used on site or during servicing. The required EBLWin version depends on the site's system and its software version. For example, the first two digits of the EBLWeb software version of the 5088 gateway must match the EBLWin version used.

Technical data

Product code	41014
Manufacturer	Panasonic
Product group	Fire alarm systems > Control equipment
Compatibility	EBLWin, EBL512 G3, EBLOne
Operating system	Windows 10 or later

Documents

The manufacturer's original documents can be downloaded from the product page (QR code at the top of this sheet).
