

PANASONIC

Panasonic FI 004 KP filter set for the Aspect detector, white, 5 pcs

Product code 60196 · Aspiring smoke detection > Filters and maintenance

Denser white main filter for the Aspect detector filter cartridge for areas with fine dust, such as welding. With frames, 5 pcs.

- Fine dust: concrete industry, welding, powder coating
- Replaced annually or on service code 4
- 5 pcs with frames

Product description

FI 004 KP is Panasonic's white, denser main filter for the Aspect aspirating smoke detector. The filter prevents dust from contaminating the sensors and comes with frames for quick replacement. The pack contains five filters.

According to Panasonic's technical description, the white FI 004 KP filter is used in areas with small dust particles, for example in the concrete industry and welding, and no VULCAN filter is used then. The main filter is replaced annually or when the detector gives service code 4. Pre-installed in a cartridge, the filters come as the FS 2010 filter box.

Technical data

Product code	60196
Manufacturer	Panasonic
Manufacturer's code	FI 004 KP
Product group	Aspiring smoke detection > Filters and maintenance
Pack size	5 pcs
Replacement interval	Annually or service code 4
Compatibility	Aspect AE2010
Colour	White
