

Fire alarm systems Frame for built-in installation (EBL128) 4568

- Same colour as the c.i.e. housing
 - Prepared for simple mounting
-

General

The frame **4568** is used for built-in (flush) mounting of **EBL128**.

The frame is made of metal and has the same light grey colour as the EBL128 housing.

The frame is used to cover the gap between the hole in the wall and the EBL128 skin (hood) for a more or less flush mounted c.i.e. (see pictures).

No screws are needed – the frame is mounted just by pushing it over the EBL128 skin (hood) after installation.

It is prepared for access to the cable entries.

Behind the EBL128 might be needed some space for mounting device.

Type number	
4568	Frame for built-in installation (EBL128).

The inner width of the frames is adapted after the widest part of the skin (hood), which means that there may be a small gap between the frame and the long sides of the skin (hood) depending on how the panel is mounted.

Two different ways to use the frame:

Optimal mounting on the widest part of the skin (hood), i.e. no gap.

Deep mounting, i.e. a small gap.

Technical data	
Size frame (outside / inside) H x W (mm)	600.2 x 496.6 / 518.2 x 414.6
Size opening in the wall (max. / min.) H x W (mm)	590 x 487 / 535 x 422
Size EBL128 H x W x D (mm)	511 x 416 x 123
Weight (g)	1750
Construction / Colour	Metal / Light grey (NCS S 1500 N, PMS Cool Grey 2)
