

## **Fire alarm systems TLON Manager kit 5095**

- Software & hardware for creation and installation of a TLON Network
- USB Network interface – for easy network connection

### **General**

TLON Networks are used for the fire alarm systems EBL512 and EBL512 G3. Each c.i.e. in the network has to have at least one TLON connection board 1590 / 5090. See the Planning Instructions for the system respectively.

### **TLON Manager kit 5095**

The kit contains the following:

- U10 USB Network interface type 75010R.
- Network connection cable (1.5 m).
- USB Memory stick, containing.
  - Echelon LNS Server, etc.
  - The PC program TLON Manager 2.0.
  - Documentation (Operating Instr.).
- USB extension cable (0.6 m).
- License (for 64 credits per PC).

### **TLON Manager 2.0**

TLON Manager 2.0 is the PC software with which a TLON project is created and installed into the network units. It is also used for maintenance of the TLON Network. For connection to the TLON Network is a USB Network interface used.

TLON Manager 2.0 will replace TLON Manager 1.X.

### **USB Network interface**

The PC with TLON Manager 2.0 is connected to an EBL512 or EBL512 G3 system via the USB Network interface and the Network connection cable. A USB extension cable is also supplied.

### **License**

With the TLON Manager kit 5095 is a 64 LNS Device credits license supplied.

One LNS Device credit is consumed for each TLON connection board 1590 (p.c.b. no. 9302-xx) but not for the succeeding TLON connection board 5090 (p.c.b. no.  $\geq$  9310-xx). (Routers will not consume any LNS Device credits.)

More LNS Device credits can be added afterwards.

### **Operating Instructions**

How to install the Echelon LNS Server and TLON Manager 2.0 is described in this document, as well as how to use TLON Manager 2.0 and how to buy more LNS Device credits.

### **Product applications**

The TLON Manager kit 5095 is intended for the fire alarm systems EBL512 and EBL512 G3 when two or more c.i.e:s shall be connected in a TLON Network.
